## Profile

I'm 22 years old developer from small city. I move to Prague and I live here during week. I'm passionate about exploring new technologies and always trying to find better way to solve a problem.

## Experience

### **FRONTEND DEVELOPER, RTSMUNITY – 2017-PRESENT**

I started as frontend developer. I worked on trading platforms build on Electron in React. Than I moved also to backend / node.js. I develop scrapers (on Nightmare), dockered microservices, APIs (REST, GraphQL) on node.js and typescript, lambda functions... I used AWS cloud and Atlassian products (Jira, Bitbucket,...). I worked in small agile team and in mob team for a while.

### **FRONTEND DEVELOPER, BPROMOTION – 2015-2018**

External work as frontend coder / backend developer. I code websites from PSD and Sketch (via Invision Inspect). I developed own CMS for microsites and build social network for weight loss.

### **CODER, PIXELMATE – 2015-2016**

I started as external worker than I join company on full-time. I was working on microsites, platform for travelers, online site builder.

### **CODER, RENCY – 2015**

Externally developing microsites from PSD (frontend and backend).

### **OWN PROJECTS – 2012-2015**

I started coding in 2012. Same year I founded digital agency T-Gate with my friends. We delivered a few websites for companies in our neighborhood.
