Profile

I'm 24 years, living in a small city. I work in IT for the last 8 years. I'm quiet person which is calm all the time. Traveling is my hobby and I'm open to trying new things every day. I'm passionate about exploring new technologies and always trying to find a better way to solve a problem. I like seeing a bigger picture not just solving one task after another. Usually, I think over the task and discussing it till it makes sense.

Experience

FRONTEND DEVELOPER, QUICHESOFT – 2019-PRESENT

I was developing an internal platform. The app is Electron based. We have used React + Typescript and Apollo for communication with graphql backend. I was lead on this project and my responsibility was to design project structure, code style, decide which libs we will use and how to solve each problem. I was doing a pretty detailed code review for my colleagues to show them the right direction.

FRONTEND DEVELOPER, RTSMUNITY – 2017-2019

I started as frontend developer. I worked on trading platforms build on Electron in React. Than I moved also to backend / node.js. I develop scrapers (on Nightmare), dockered microservices, APIs (REST, GraphQL) on node.js and typescript, lambda functions... I used AWS cloud and Atlassian products (Jira, Bitbucket,...). I worked in small agile team and in mob team for a while.

FRONTEND DEVELOPER, BPROMOTION – 2015-2018

External work as frontend coder / backend developer. I code websites from PSD and Sketch (via Invision Inspect). I developed own CMS for microsites and build social network for weight loss.

CODER, PIXELMATE – 2015-2016

I started as external worker than I join company on full-time. I was working on microsites, platform for travelers, online site builder.

CODER, RENCY – 2015

Externally developing microsites from PSD (frontend and backend).

OWN PROJECTS – 2012-2015

I started coding in 2012. Same year I founded digital agency T-Gate with my friends. We delivered a few websites for companies in our neighborhood.

Education

Business Academy, Kostelec and Orlicí – Maturita, 2015

Applied Informatics UHK, Hradec Králové – Interrupted, 2016

Skills

Node.js, Typescript, ES6, PHP, HTML5, CSS3, LESS, SASS

Technologies

React, Redux, Apollo, AWS, Next.js, Nightmare, Docker, Mocha, Electron, Express, Webpack, Knex, Bluebird, Standard, ...

Languages

Czech – native speaker

English – C1
